STOCKER & CO. ROCHESTER, N.Y.

KING TOMPKINS CO.

A superb apple of the finest quality. Tree a vigorous grower and good bearer. More hardy than some others and popular as a market apple. Ripens through mid-winter.

STECHER LITH. CO. N.Y.

ALEXANDER.

Of Russian origin, and desirable on account of its hardness, large size, and handsome appearance. Ripens in Autumn. Valuable for market.

Spitzberg
Rochester, N.Y.
1870

SPITZENBERG.

(ESOPUS.)

A handsome and delicious apple, unsurpassed as a dessert fruit. Keeps through Winter.

BELLE DE BOSKOOP.

Of Russian origin, and one of the leading Ironclad varieties. Tree vigorous and spreading, comes into bearing early and produces abundantly. Flesh tender, juicy, brisk, sub-acid, rich and of very good quality. In season from Feb. to April.

RHODE ISLAND GREENING.

An old favorite for the market or family use; an abundant bearer. Fruit tender, juicy and rich, with an agreeable, rather acid flavor. December to April.

BEN DAVIS.

(New York Pippin, Kentucky Streak, Etc.)

This is a very vigorous, hardy, and productive variety; keeps late. Highly esteemed in the west and south-west.

DELAWARE WINTER.

A new late-keeping Winter Apple, with a juicy sub-acid flavor, valuable for market and family use.

Extra Quality.

Duchesse of Oldenburg, N.Y.

DUCHESSE OF OLDENBURG.

An autumn apple, of Russian origin; one of the most hardy varieties known; a vigorous grower; abundant bearer and of excellent quality. Very desirable for the extreme North; also, one of the best of its season in the South and West.

GEN. GRANT CRAB.

Enormously productive, handsome and of good quality; tree quite ornamental when in flower and in fruit.

Extra Quality.

Ward's and Co. N.Y.

HYSLOP CRAB.

Rather later than some others. Very valuable everywhere, and popular in the West on account of its hardness, productiveness and great beauty.

LARUE.

Originated on the St. Lawrence River, in Canada, and hardy enough to successfully endure the cold of that section; flavor sub-acid; flesh white and solid. A valuable winter apple. In season from November to March.

LONGFIELD.

A new Russian variety ; one of the best. Tree a good strong grower, and has proved itself to be an early, abundant, and annual bearer. Flesh white, fine, tender and juicy, with a rich, sprightly, sub-acid flavor. December to April.

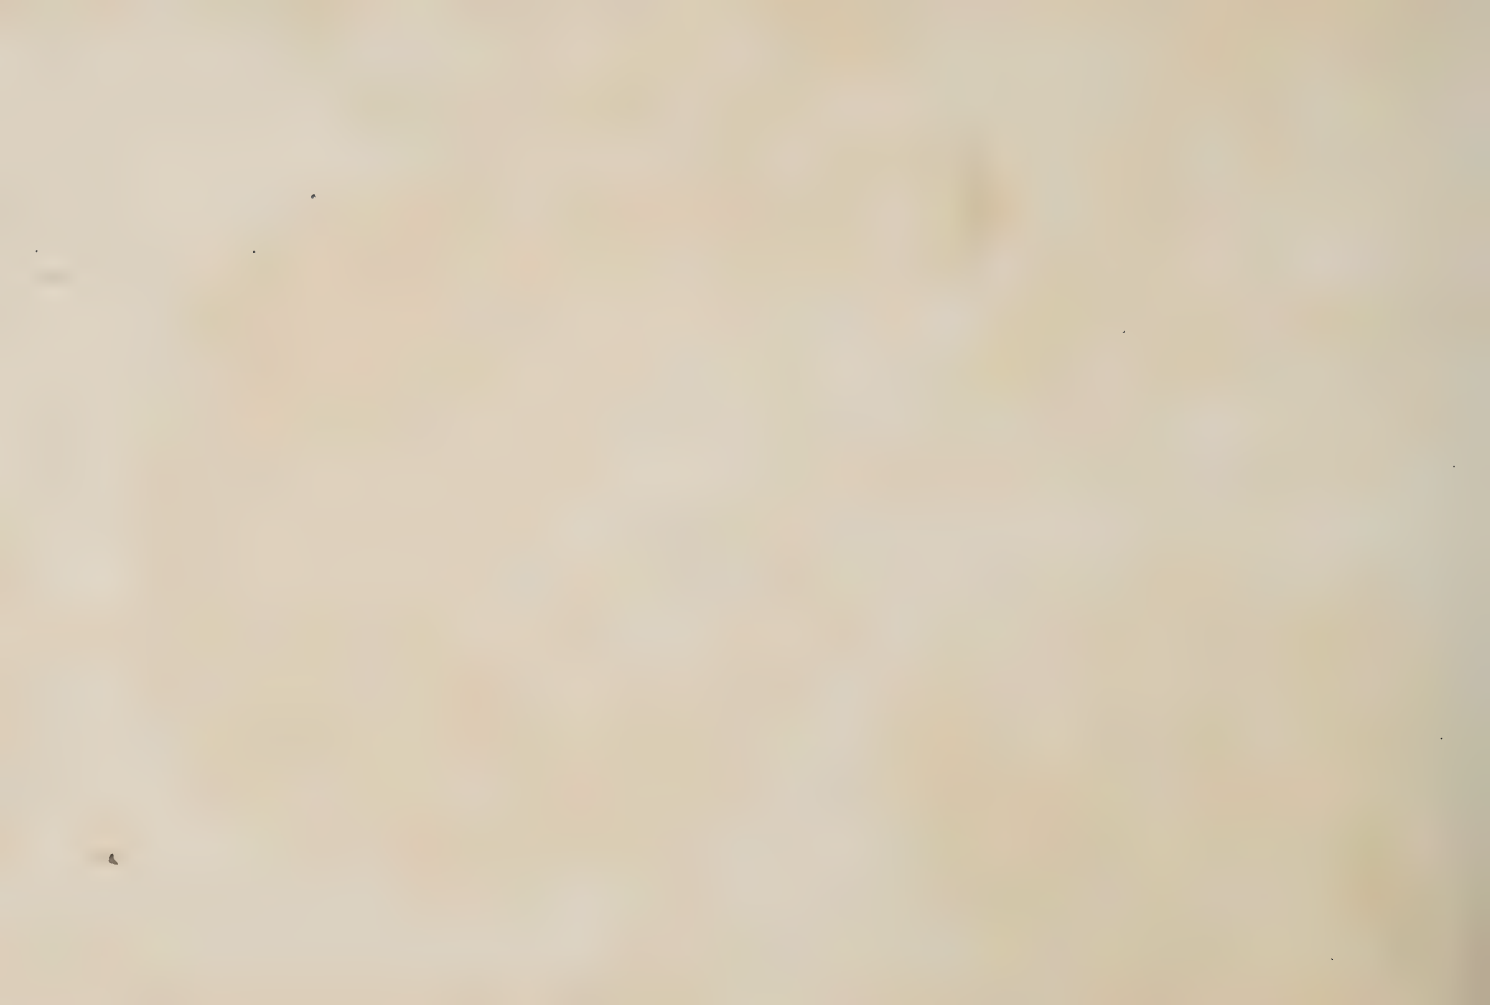

MANN.

This is one of the most valuable hardy varieties yet introduced. Fruit tender and juicy, with mild sub-acid flavor; bears early annual crops; keeps until April; desirable for the extreme North. Saleable trees 5 to 6 feet.

MC. INTOSH.

Originated in Canada, and there considered equal to the well-known Fameuse. Flesh white, fine, very tender, juicy and refreshing. November to February.

PEWAUKEE.

Originated in Wisconsin from seed of Oldenburg. Very hardy. Excellent Quality.
Ripening from January to May.

ROLFE.

This new variety originated in Guilford Centre, Me., where it is now grown very extensively and regarded as perfectly hardy. A good bearer and of fine quality. Flesh light sub-acid and core very small. Excellent for cooking or the table, and classed as one of the most attractive and best selling varieties. Season October and November. 5 to 6 feet.

ROME BEAUTY.

A very handsome and valuable winter apple, ripening from mid-winter to late spring.
Tree hardy and productive.

STARK.

Valuable and profitable as a market variety on account of its long keeping qualities. Tree a good grower and abundant bearer. Keeps until May. 5 to 6 feet.

TRANSCENDENT CRAB.

A variety of Siberian. Tree a hardy and robust grower. One of the most beautiful when in fruit. Valuable for preserves.

STECHER LITH CO ROCHESTER N.Y.

WEALTHY.

New and valuable. Tree hardy and productive. Flesh white, fine grained, tender.
December and February.

WHITNEY'S SIBERIAN CRAB.

Valuable as a dessert apple, of good quality. Tree productive and handsome in foliage.

WALBRIDGE.

(Edgar Red Streak.)

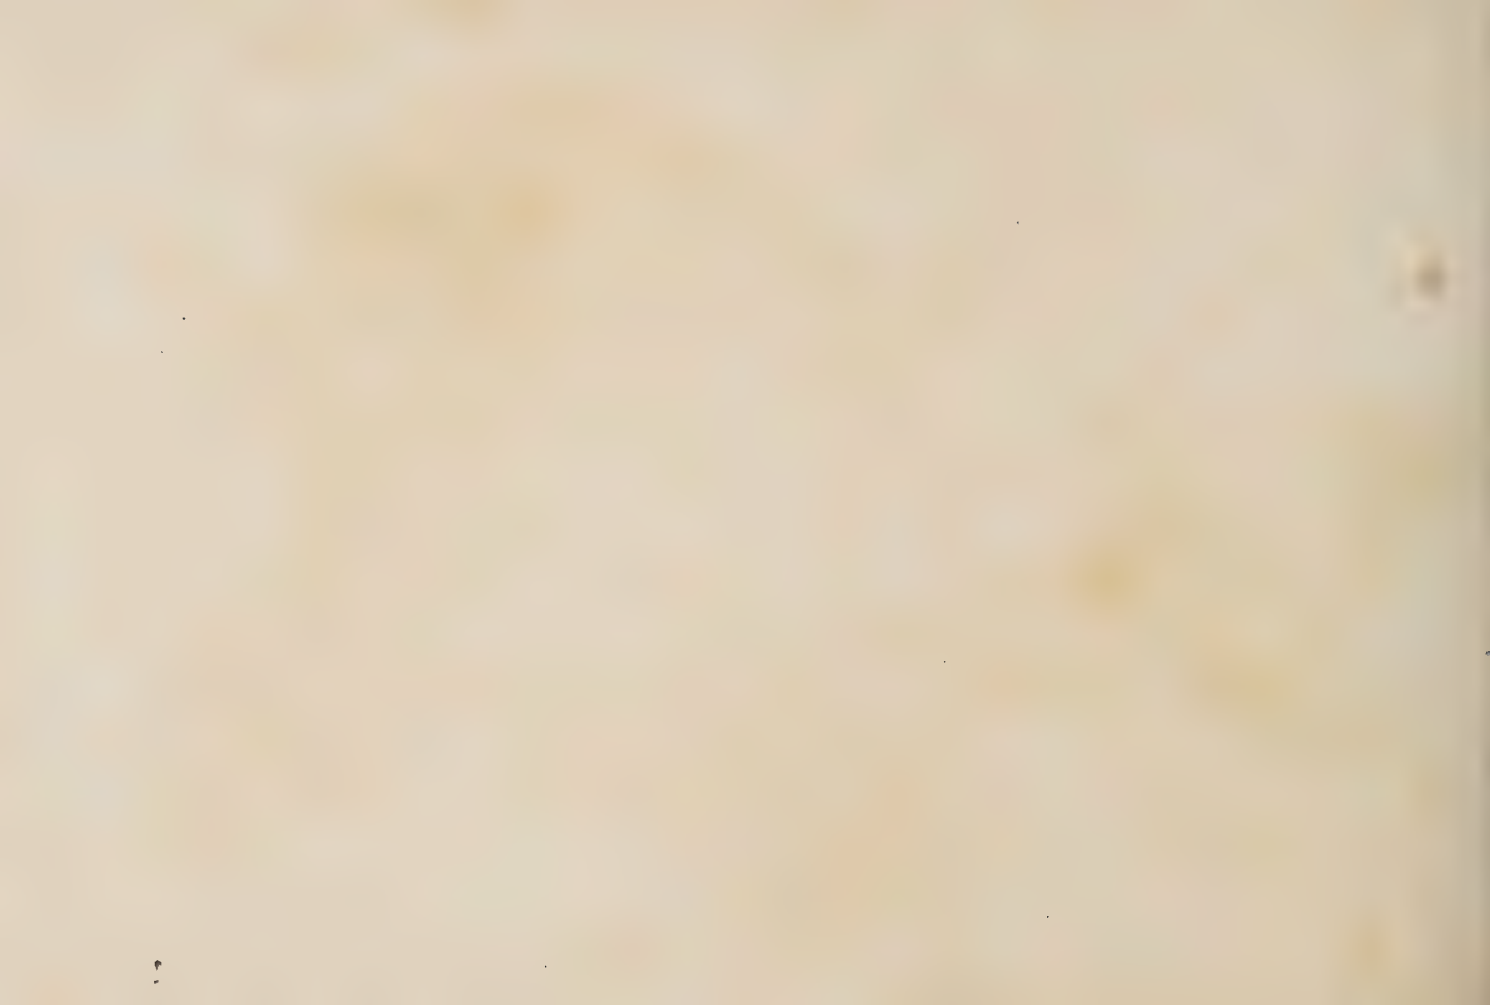

Highly esteemed and valuable in cold sections for its hardness and productiveness; quality good; in season from January to May.

RUSSIAN TRANSPARENT.

Of Russian origin, but now largely planted East, West, North and South, and succeeds everywhere as a very hardy, early ripening, excellent variety.

W. G. B. 1874

STECHER, LITH. CO. PHOEN. A.

BARTLETT.

One of the best known and most popular pears. A free grower and early and productive variety.

STECHER LITH CO ROCHELY

BEURRE D'ANJOU.

A vigorous grower and very productive, succeeding as a standard or dwarf. In season during mid-winter, and beyond question is the best pear of that season.

BEURRE CLAIRGEAU.

A magnificent, showy, autumn variety. When ripe, highly colored. An abundant bearer and of good quality. From its very handsome appearance and productiveness it is a most valuable market sort. No variety with which we are acquainted presents a more tempting show or makes a more attractive dish for the table. Grows fine and thrifty only as a Standard.

STECHER LITH CO ROCHESTER N.Y.

CLAPP'S FAVORITE.

Fruit handsome, fine grained and rich in quality ; tree as hardy as Flemish Beauty, and succeeds generally over a large extent of territory.

DUCHESSE D'ANGOULEME.

One of the best and most valuable varieties; trees bear quite young, and is the most profitable kind to grow as a dwarf. . . October and November.

FLEMISH BEAUTY.

One of the very hardiest and most productive varieties. Succeeds over a large extent of country, and is highly appreciated for its many good qualities.

KIEFFER'S HYBRID.

Recently introduced; but has become well known and appreciated for its many good qualities. Valuable for canning.

LAWRENCE.

A valuable variety for the amateur or orchardist, and unsurpassed in its many good qualities among our early winter pears. Grows well either as a standard or dwarf. Decem- ber. Standard not less than 5 to 6 feet. Dwarf 3 to 4 feet.

IDAHO PEAR.

Size large; color rich yellow; flesh white, fine grained, buttery, melting and rich. The parent tree bore fruit the fourth year from the seed. Originated in Idaho; very hardy, and promises to succeed in nearly every section of the country. Almost seedless and coreless. Sep. and Oct.

VERMONT BEAUTY.

A beautiful new seedling pear that originated in Northern Vermont. Fruit of medium size ; flesh melting, sprightly, and of the best quality ; tree healthy, hardy and very productive. October.

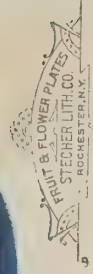

DEMPSEY.

The Dempsey was produced from a seed of the Bartlett, fertilized with Duchess D'Angouleme. Tree an upright, good grower; foliage large, glossy dark green, resembling both parents. Fruit large, obtuse pyriform, irregular in outline. Skin smooth, green, changing to yellow as it ripens, with a slight brown tinge where exposed to the sun. Stem about an inch long, stout and set slightly to one side. Cavity shallow. Flesh white, fine grained, tender, buttery, almost melting, with a rich, sweet delicious flavor. As a dessert or market pear it is of the highest merit. It will stand transportation to the most distant markets. Season, October and November.

ABUNDANCE.

Equaling in thrift and beauty any known fruit tree ; an early and profuse bearer ; flesh light yellow, tender and juicy, with a rich sweetness, ripening early in the season.

COLUMBIA PLUM.

Tree a good bearer, and fruits annually. Flesh rich and of a pleasant flavor. Good for preserves and canning.

YELLOW EGG.

Tree a good grower, thrifty and hardy, very productive.
and valuable for canning.

Fruit of very best quality,

FRUIT & FLOWER PLATES
BY STECHER LITH CO.
ROCHESTER, N.Y.

QUACKENBOSS.

A very ripid, upright grower, and productive; fruit large; flesh greenish yellow, sprightly, juicy, a little coarse grained, sweet and sub-acid; adheres slightly to the stone. Sept.

LOMBARD.

"Tree very vigorous and productive ; fruit of good size, juicy with good flavor ; one of the most hardy varieties known ; popular and valuable everywhere August and September. Not less than 5 feet

COPYRIGHT, 1899
STEECHER LITH CO. ROCHESTER, N.Y.

EMERALD.

The above cut is a photograph of this plum, no exaggeration whatever, for size, measure it with a rule. Greenish yellow, superb quality, equal to Green Gage, its parent. Tree very productive, fruit never known to rot, though the original tree has had six or more crops upon it and what is of even more importance, ripens in Niagara District in July two weeks earlier than Abundance.

STEELE LITH. CO. N.Y.

SHIPPERS' PRIDE.

A plum of large size, handsome appearance. Tree hardy, healthy and productive. Valuable for market or family use.

MOORE'S ARCTIC.

Tree a good grower, quite hardy and very productive, so much so as to be unaffected by the curculio ; producing enormous crops of fine fruit.

Drawn by J. A. Cooper, F.R.S.

FRUIT & FLOWER PLATES
STECHER LITH. CO.
ROCHESTER, N.Y.

GLASS.

Tree hardy, very vigorous, upright and very productive; a showy fruit, valuable for market and culinary purposes; flesh greenish yellow, sweet and good; separates freely from the stone. Ripe in Sept.

STIPPLED BY H. H. H. 11

GERMAN PRUNE.

A very vigorous and productive variety, esteemed for drying and preserving; hangs long on the tree; has a sweet, pleasant flavor.

GRAND DUKE.

One of the handsomest of all the European varieties has been sufficiently tried in this country and can be recommended as one of the best in every way.

WILD GOOSE.

An American variety; grows rapidly; hardy and productive.

EARLY CANADA.

Ripens with the earliest quality good, nearly freestone.
Juicy and delicious.

THE "CROSBY." (EXCELSIOR.)

Originated near Lowell, Mass.; tree low spreading, willowy habit of growth, *fruit buds hardy*, so that "CROSBY" produces full annual crops when all others fail; fruit medium size, rich orange yellow splashed with carmine on the sunny side; perfect free-stone, pit small, flesh yellow, juicy, tender, sweet and rich.

DESIGN COPYRIGHT
STEELES LTD. C

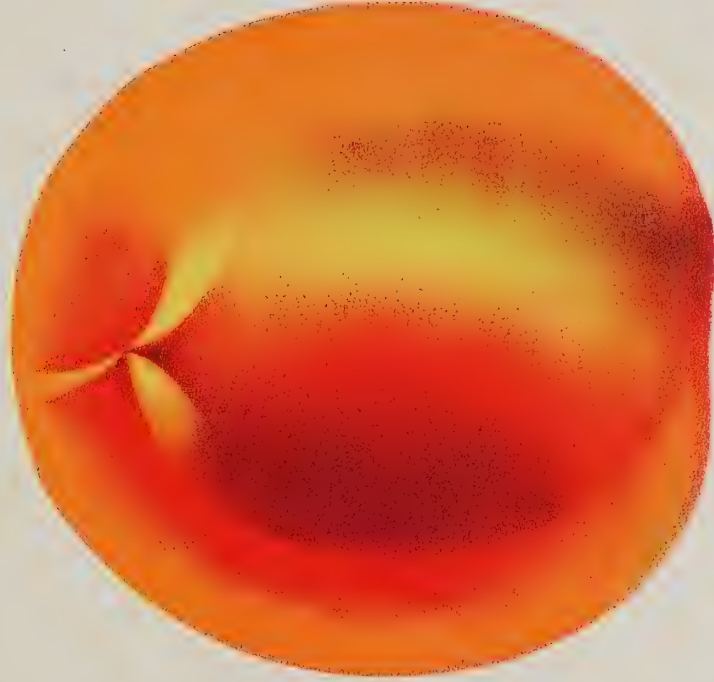

LONGHURST PEACH.

Ripens between Late Crawford and Smock; is extremely hardy bearing when most others fail; yellow flesh, freestone, about medium size.

STEWART PEACH.

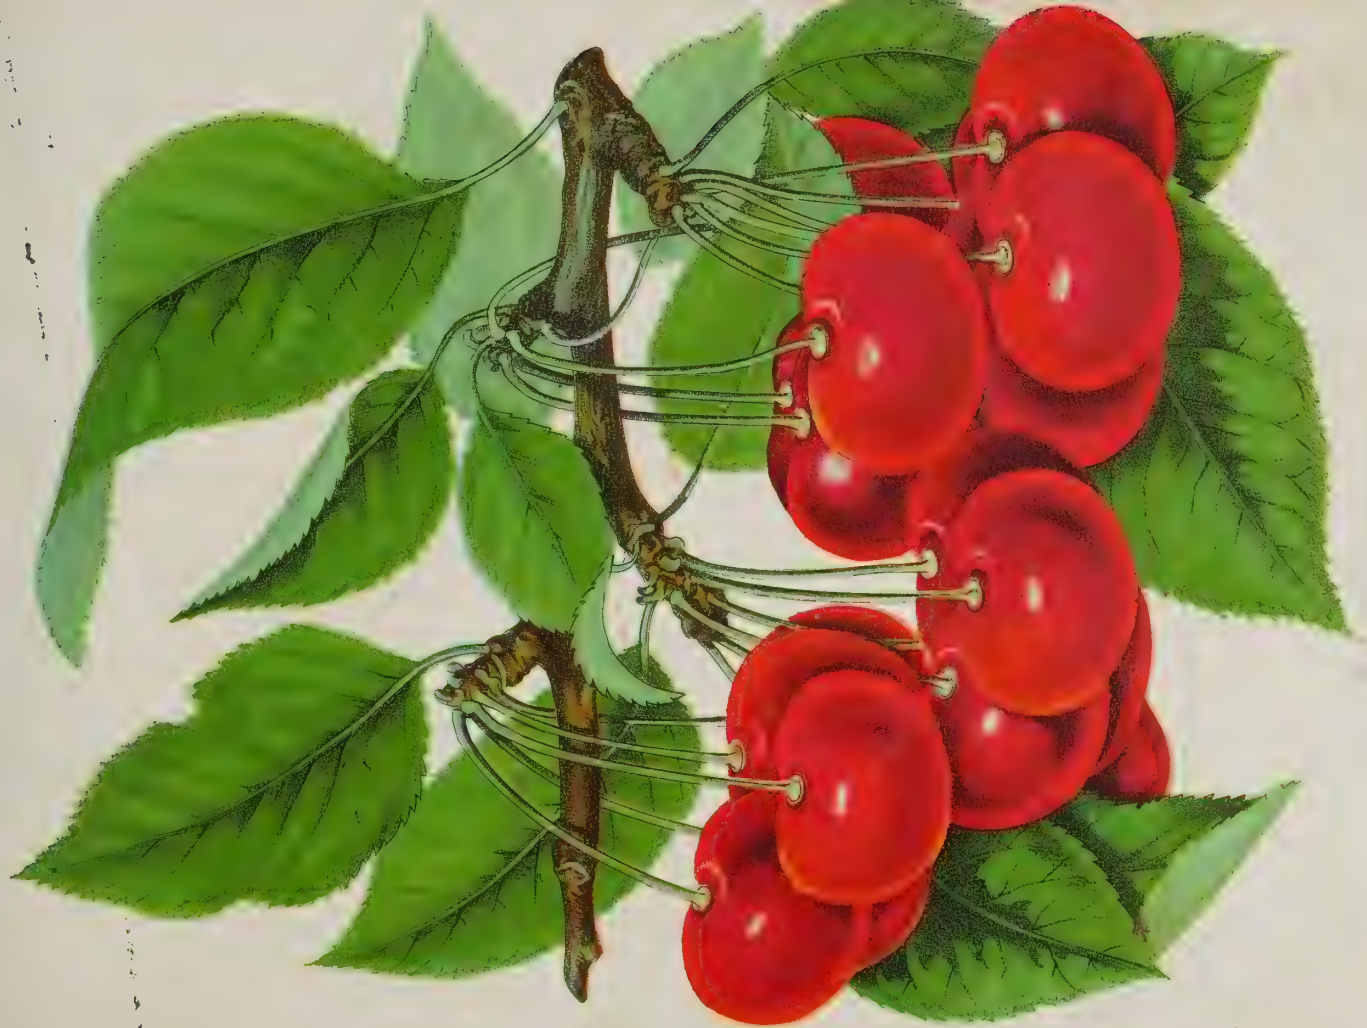

Ripens last of August. Size very large, equal to Crawford's, Early both in appearance and quality, and being very hardy bears regularly; has borne nine heavy crops in succession on the original tree.

STELHURST CO. ROCHESTER, N. Y.

TYEHURST PEACH.

Large yellow flesh, freestone, very hardy, heavy cropper, first of September
Originated in Essex Co., Ont.

LARGE MONTMORENCY.

Ripens ten days later than Early Richmond; tree very prolific and hardy, and a variety of great value.

Staples, Litchfield, Photo. V.V.

OSTHEIME.

A native of Russia ; it has been tested in the severest winters in Minnesota and found to be perfectly hardy ; a young and profuse bearer ; flesh reddish, tender, juicy, sub-acid. Very good.
Season, middle of July Morello class.

WINDSOR.

A sweet Cherry which originated in Canada some years since, near Windsor. Tree hardy, very productive, ripens after many others and prolongs the season of this summer fruit.

SCHMIDT'S BIGARREAU.

A native of Belgium, hardy and very productive. Flavor rich, aromatic and delicious.
One of the finest of black cherries.

VLADIMIR CHERRY.

Very hardy ; most largely grown in Russia ; nearly black ; flesh fine with sprightly acidity ;
tree dwarfish

APRICOTS.

This is a delicious fruit, indispensable in a choice selection for the garden. Ripens
between cherries and peaches.

RUSSIAN APRICOTS.

- 1 BUDD.—Tree hardy, strong grower and profuse bearer; flavor rich and sweet, with a sweet kernel equal to the almond; Ripens Aug. 1st.
- 2 ALEXANDER.—Tree hardy, an immense bearer; flavor sweet; ripens July 1st.
- 3 ALEXIS.—Tree hardy, an abundant bearer; flavor slightly acid, rich and luscious; ripens middle July.

STANDARD FRUIT CO. BOSTON, N. Y.
Extra Quality.

ORANGE QUINCE.

One of the most popular varieties in this country. Bears abundantly; most excellent for cooking.

MOORE'S EARLY.

A very early and exceedingly hardy variety; fruit of large size and good quality.
two weeks earlier than the Concord.

Ripens about

WORDEN.

Very much like Concord in growth and appearance; ripens earlier and is superior in quality.
A first-rate market and family grape, succeeding generally.

HE
MOYER

NEW, EXTRA EARLY,
BEST QUALITY,
HEALTHY & HARDY.

This new grape originated in Canada, and seems to be a cross between the Delaware and some purely native variety. In habit of growth, hardiness, quality and size of cluster it resembles the Delaware very much, but it ripens with the very earliest, has larger berries, and so far has been free from rot and mildew, even in places and seasons where everything around it mildewed. It has stood, unprotected, 35° below zero without injury. Very sweet as soon as colored, skin tough, but thin, pulp tender, juicy, of delicious flavor, and entirely free from foxiness. Imagine a Delaware free from rot and mildew and early as Champion, and you will have a fair idea of this most valuable new variety. It never drops off its stem and when ripe gradually shrivels and dries up into raisins.

THE WINCHELL.

The earliest white grape. Hardy, vigorous, productive and of fine quality.

THE CHOICE NEW EARLY
WHITE GRAPE
"MOORE'S DIAMOND."

From seed of Concord, fertilized with Iowa, by J. C. Moore, Brighton, N. Y. (the seed known as "J. C. Moore's") and other new fruits, which are this the most valuable variety. It is thus ever produced in a large quantity, color and texture, foliage and the air of vine. It produces a large quantity of fruit, and is one of the best tender sorts, and ripens from two to ten weeks, and is a Concord.

ROGERS' No. 9. (LINDLEY.)

This is one of the best of Rogers' Seedlings. Vine vigorous and very productive; bunch medium, rather long and compact. Flesh tender, juicy, sweet, slightly aromatic.

Ripens a little before the Concord.

WYOMING RED GRAPE.

Very early, handsome red clusters, compact ; size considerably larger than Delaware ; very productive ; a profitable, hardy grape.

PLATE I.

CHERRY & CO.

THE FINEST QUALITY OF THE WINE OF THE CHERRY & CO. IS NOW AVAILABLE.

FOR THE WINE OF THE CHERRY & CO.

FAY'S PROLIFIC.

Wonderfully productive and of the very largest size and handsome appearance.

RUBY CASTLE.

A splendid variety, ripening two or three weeks later than others and continuing in a fine condition for a long period. Bunches extremely long; berries of medium size and of the highest quality.

COLLINS' PROLIFIC.

Very early ; berry large ; quality excellent ; strong grower and very productive. Best early black currant ever offered.

WHITE GRAPE CURRANT.

Very distinct and valuable with a mild and pleasant flavor; a productive and excellent sort.

DOWNING.

An American gooseberry of large size and great merit; free from Mildew.

SMITH'S IMPROVED.

A vigorous grower and very hardy; originated in Vermont; flesh moderately firm, sweet and good.

WHITESMITH.

Plant very vigorous and a good bearer ; berries large, transparent, and good, sweet flavor.

INDUSTRY GOOSEBERRY.

GOLDEN QUEEN.

Very productive, and of the strongest growth. Hardy, and in quality unsurpassed.

MARLBORO.

Has thus far proved to be one of the hardiest, earliest, largest and best carrying berries known. From its unparalleled firmness growers will send it from Rochester to New York by rail, nearly 400 miles. The originator now has berries of the Marlboro preserved which are $1\frac{3}{4}$ inches in diameter. Cups of them have been kept a week in good order for the table in the Marlborough postoffice, they being thrown out on the hand and back again each day, while many other varieties by their side, with the same treatment, were spotted the third or fourth days. In regard to its earliness the Rural New Yorker acknowledges the receipt of ripe fruit on the 28th of June. It required two days for the berries to reach the Rural.

STECHER LITH CO ROCHESTER N.Y.

GAINOR BLACKBERRY.

This choice new Black berry originated a few miles from our nurseries, being a chance seedling. Our attention was first called to it by its extreme hardness. While other Blackberries near it were killed or damaged by the extreme winter of '81, the Gainor was unharmed, and the following season bore a large crop of large, handsome fine flavored fruit. Larger than Kittatinny, a deep black, and in quality good, tender and sweet. Its large size, fine quality and extreme hardness, make it the Blackberry we have been so long wanting. We offer it with confidence and our strongest recommendation.

HILBORN.

One of the best black-caps ; very hardy and prolific ; does well on light or heavy soil ; canes strong and vigorous ; fruit of excellent quality—firm, and well adapted for shipping or drying purposes.

Spicer & Co. Wash. D.C.

PALMER.

A new variety; this berry has attracted much attention by its vigor and healthy appearance of the bush; wonderfully productive, ripens very early and has never failed to produce a full crop. Fruit large and of a very fine quality.

CARPENTER'S SEEDLING,

The earliest black cap ; exceedingly productive ; prime quality ; good size. Whole crop gathered early at two or three pickings ; cane vigorous and upright.

WESTERN TRIUMPH.

A vigorous grower, very hardy, and immensely productive; one of the best for market or home use.

STONE'S HARDY

A very hardy and productive variety, producing fruit of first quality, sweet and rich ; fine for market and family

DEWBERRY.

Sometimes called Trailing Blackberry; hardy, and produces an abundance of sweet and delicious fruit.

BUBACH'S No. 5.

Very productive, with a fine flavor; fruit solid. New and distinct.

Extra Quality

Wheeler & Co. (Collectors, N.Y.)

WILLIAMS STRAWBERRY.

Ripens with Wilson. Very firm, good quality, handsome appearance, large size ; very productive, perfect blossom, strong plant and good runner, being nearest to perfection so far

CAPTAIN JACK.

One of the new sorts, and destined to rank among those of No 1 quality. Fruit sets well, is of the highest flavor, firm, making it a valuable market berry, and in productiveness equal to Wilson's Albany.

CONOVER'S COLOSSAL ASPARAGUS.

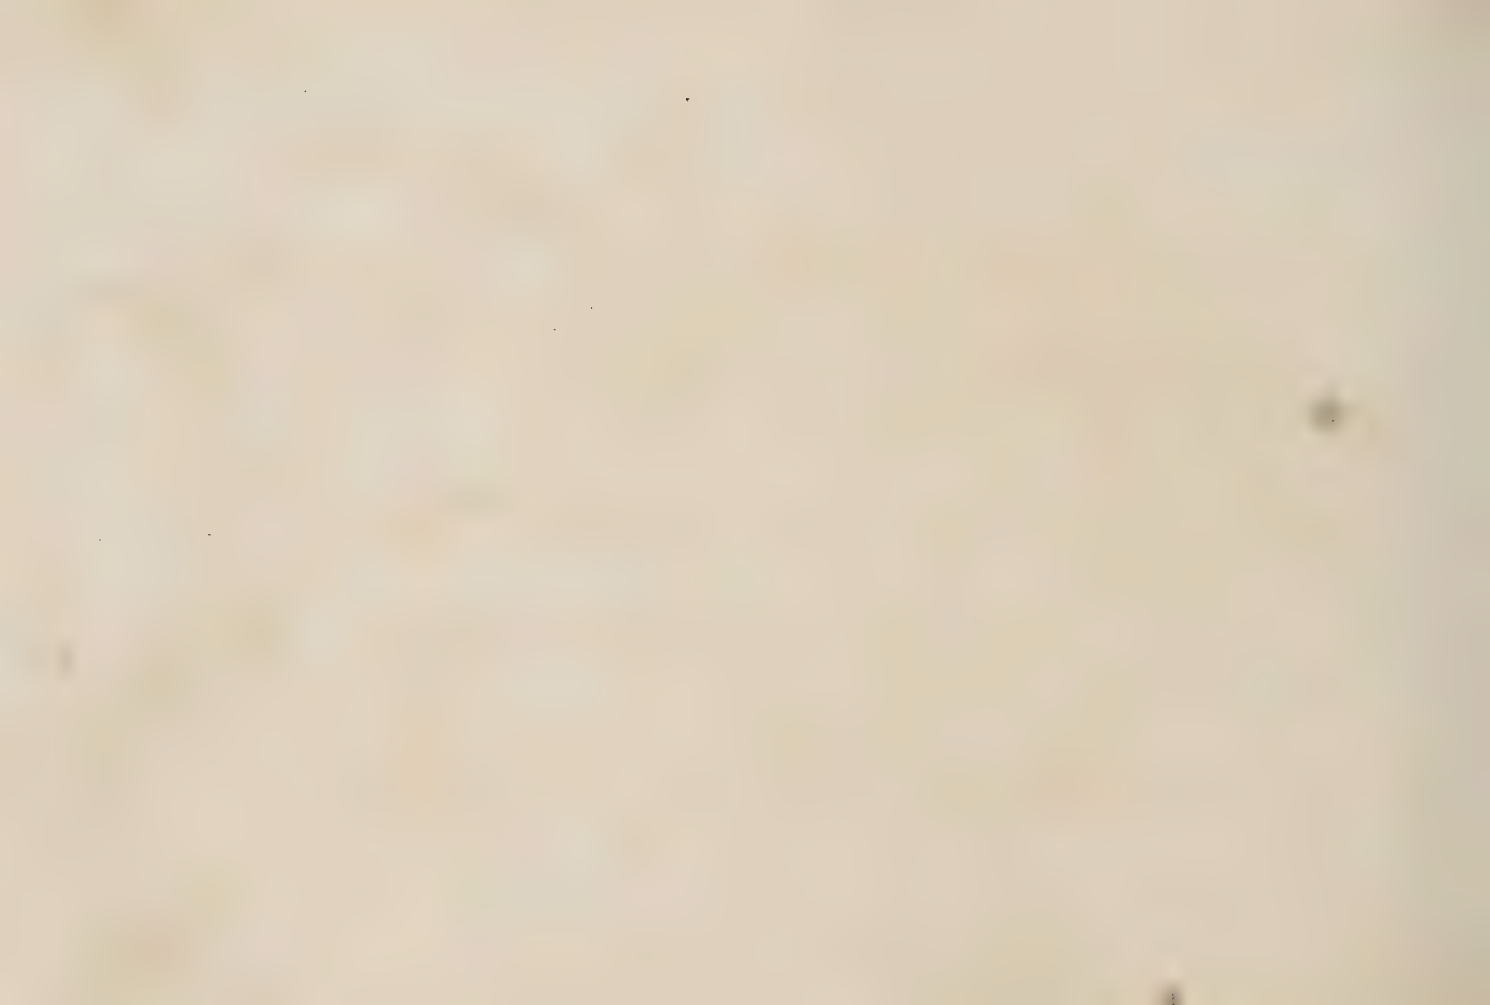

It is remarkably tender and fine flavored variety often produces stalks one and one-half inches in diameter. It is one of the most delicious and healthful of vegetables, and coming so early should be in every garden. The ground should be rich and the plants, with roots spread out and covered three inches above the crown, placed in rows from two to three feet apart and eight inches apart in the rows.

RHUBARB.

(ONE-FOURTH NATURAL SIZE.)

Valuable for making sauces and pies. The earliest product of the garden.

Sketch by J. S. P. 1871

NORWAY MAPLE.

A rapid growing, lofty, spreading tree, well adapted to street planting; has clean and beautiful foliage.

Rubus idaeus L.
Raspberry

PLANT. MAGAZINE, 1810, p. 10.

Illustration of the Raspberry, *Rubus idaeus* L. (Rosaceae). The drawing shows the characteristic pinnately compound leaves and the terminal raceme of bright red, globose drupelets. The illustration is a color reproduction of a historical botanical plate.

STE. MAR. CITH. LO. REGH. N.

ARBOR VITAE PYRAMIDALIS.

SCOTCH PINE.

A hardy, rapid growing evergreen, with stout, erect shoots. Desirable for planting on lawns, or as screens and wind breaks.

NORWAY SPRUCE.

(*ABIES EXCELSA*.)

A lofty, elegant evergreen tree. Branches droop when the tree attains the height of fifteen or twenty feet.

JAPAN QUINCE.

(*Pyrus Japonica*.)

One of the first shrubs to unfold its beautiful scarlet flowers in spring. Very hardy and valuable as an ornamental hedge plant.

WEIGELA ROSEA.—DIERVILLA.

(ROSE COLORED WEIGELA.)

An elegant shrub with clear, rose colored flowers, which are produced in the greatest profusion in June. Very valuable and effective.

SPIREA--VAN MOUTII.

One of the most charming and beautiful of the Spireas, having pure white flowers in clusters or panicles nearly two inches in diameter ; wonderfully profuse in bloom, and plants remarkably vigorous and perfectly hardy, never being injured by our severe winters

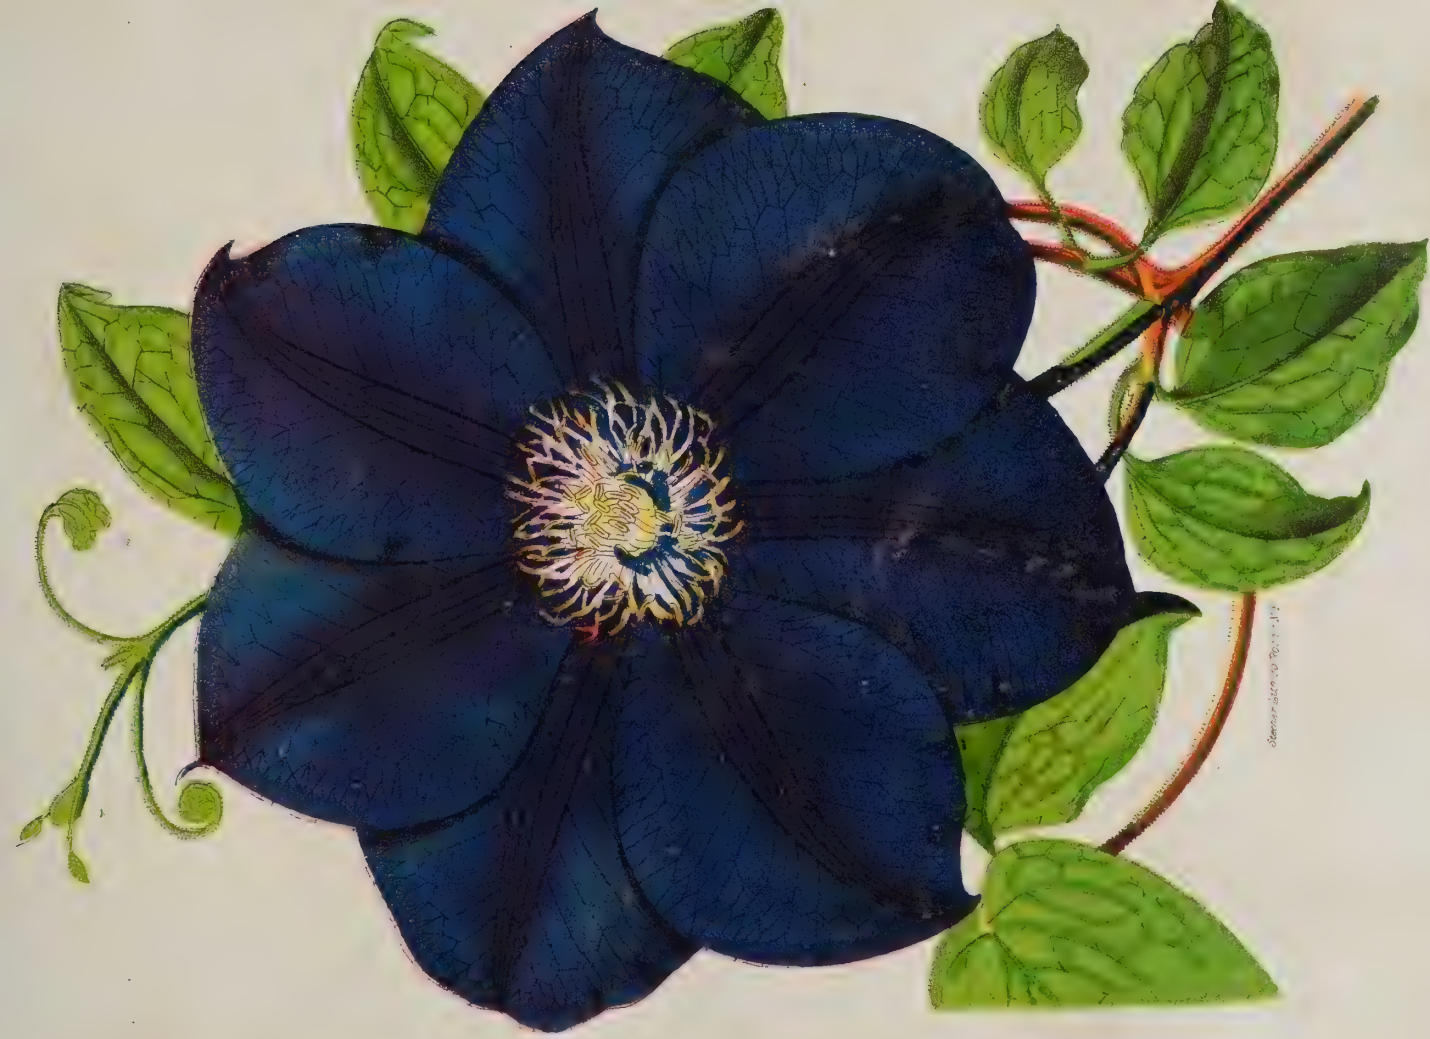

PURPLE BERBERRY.

(*Berberis Purpurca.*)

The Berberies are all interesting shrubs, varying in size from 2 to 5 feet. The purple variety is very distinct, and makes a pleasing contrast when planted with or near other shrubs.

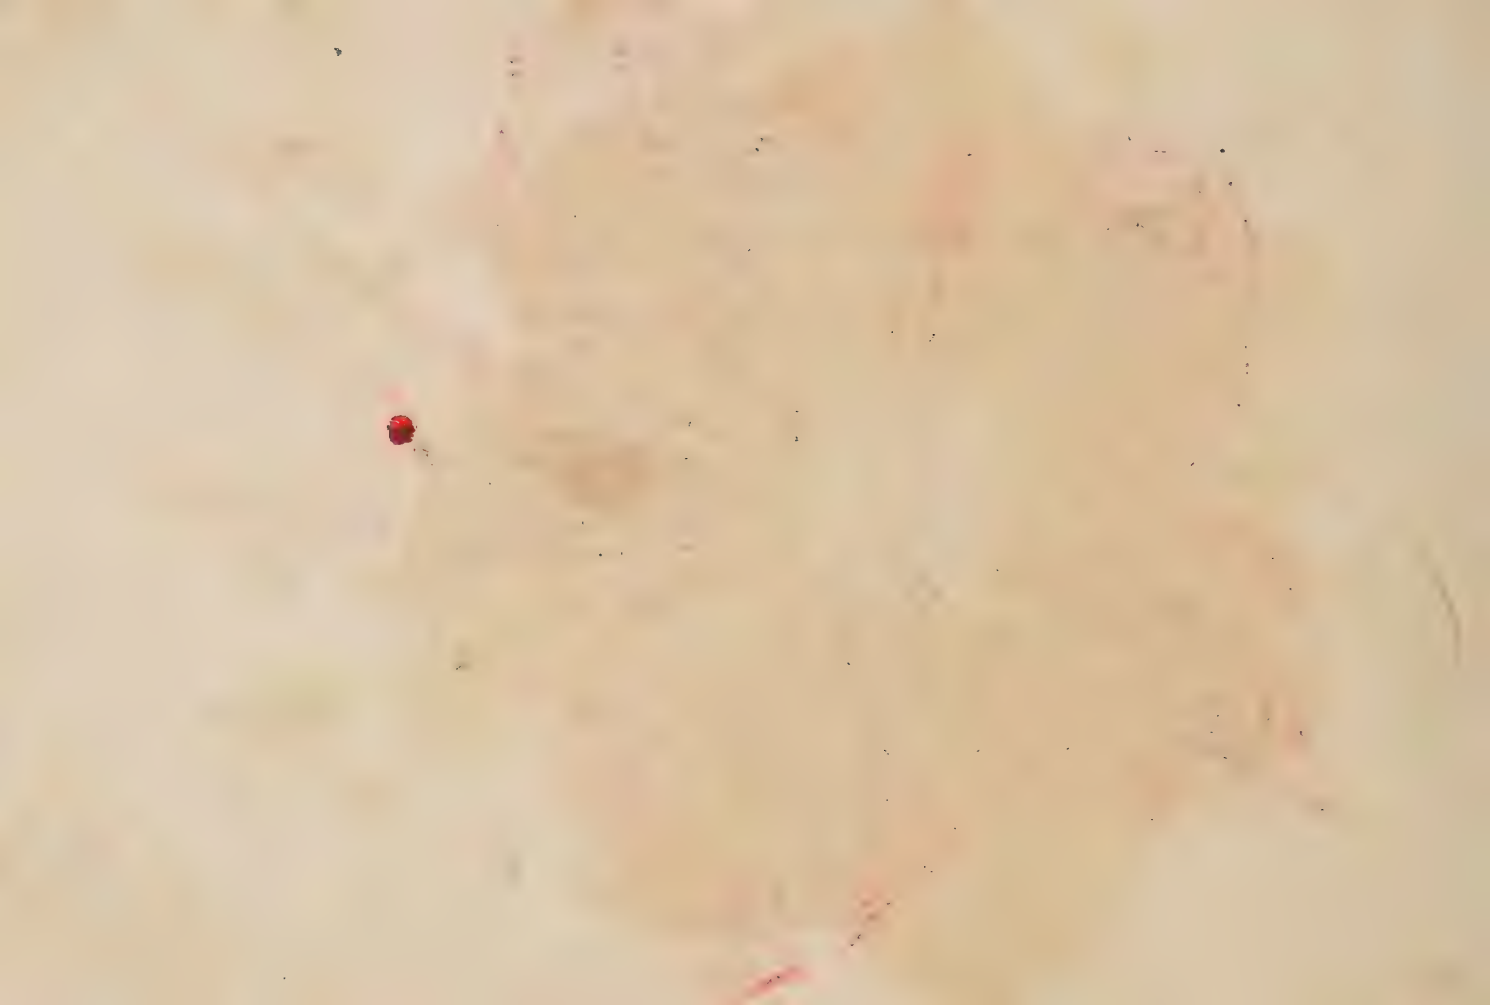

CLEMATIS JACKMANII.

Now well known and justly appreciated as one of the best of the many varieties of this popular hardy climbing plant.

VITICELLI RUBRO GRANDIFLORA.

This is a valuable acquisition, being the nearest approach to a crimson Clematis yet obtained ; the flowers are very abundant, blooms from July to Oct

CLEMATIS.—PERPETUAL WHITE.

All the varieties of Clematis are very beautiful, hardy and rapid growing, free flowering vines, well adapted for verandas, porches, etc.

STECHER LITH CO. ROCHESTER N.Y.

DAHLIAS.

There are many varieties of this popular fall blooming plant, the roots of which require the protection of a cellar during winter. Very showy and of the easiest cultivation.

CLIMBER. JAPAN HONEY-SUCKLE.

... from the ... until ... and ... to ...
... it flowers in abundance from July to December,

STECHER LITH. CO. NEW YORK

GEN. JACQUEMINOT.

A beautiful, well-known sort; blooms freely; a fine growing rose, universally planted and very popular; a magnificent variety.

W. P. Marshall, N.Y.

MARSHALL P. WILDER.

Vigorous grower, with clean, healthy foliage, flowering profusely, and long after others are out of bloom

PERSIAN YELLOW.

The best hardy yellow rose in cultivation ; has an abundance of yellow bloom early in the season.

QUEEN OF PRAIRIES.

A strong and vigorous grower and very free bloomer; one of the best climbing roses.

Reicher, Art. Co. N.Y.C., N.Y.

BALTIMORE BELLE.

White with bluish center, very full and double; one of the finest climbing roses; a rapid grower, with hardy and luxuriant foliage, and immense clusters of flowers.
